The number of charging points for electric vehicles in the Netherlands continues to expand, including in Brabant. It is important to check in advance where you can charge your electric vehicle. Please note! Not all international charging passes work with all charging posts, so please check in advance. It is also important to check whether or not you need to pay for the parking at the charging post itself as this can vary between locations.

## Public transport – train

Tickets: You can use a disposable chip card (chipkaart) or the anonymous OV chip card. The disposable chip card is for one-time use only. They can be purchased at ticket machines or at [Nationale Spoorwegen](https://www.ns.nl) (NS) service desks in railway stations. With this ticket type, there is a €1 surcharge per journey. You must check in and out.

The anonymous OV chip card can be used more frequently and can also be purchased at NS ticket machines or service desks. There is a one-off fee of €7.50, but the card can also be used on buses, trams, metro trains and ferries. You must charge your OV chip card at a NS ticket machine before travel. Please note! To travel by train, you must have a minimum balance of €20 on your card. You also need to check the OV chip card in and out on the posts in the station.

Please note! NS ticket machines only accept debit cards.

Facilities vary from station to station. All stations have an NS ticket machine to allow you to purchase tickets. Larger stations also have a service desk or information desk.

All stations have yellow information boards detailing the timetable from the early morning until evening. There are also departure boards above the platforms showing the time of the next train and its destination. Should the timetable change, it will be announced and displayed on the departure board above the platform. You should always keep an eye on the departure board.

### **Public transport – bus**
